NCCE - Digital Writing

### Subject Specific Concepts

- Computer Science
- Creators
- Information and Communication

# Overview

#### **Digital Writing**

-We can use digital devices to help us to write.

 The programs that we do this on are called word processors. Examples of word processors include Microsoft Word and Google Docs.

 -When we use word processors, we can use a keyboard and a mouse to enter and remove text.

-We can also change the look of the text by changing things like the font and the size.

 Writing digitally has the benefit that it is neat and tidy, and it can be easily edited.

Berlin Sans FE V

The undo tool reverses the last thing that you

did. If you make a

mistake, the undo tool

can help you to get it

back to how it was.

The redo button re-does

something that you have

undone!

BIU

Clicking on this icon allows you to <u>change the font</u> (style) of the text. Most word processors have many styles to choose from.

These tools can change the text.

The B makes the text **Bold.** 

The I writes the text in Italics.

The U underlines the text.

Clicking on this icon allows you to change the size of the text.

After pressing the icon, you will see a list of numbers. The larger the number selected, the bigger your text will be.

Clicking on this icon opens the text colour tool. It allows you to change the colour of the text. There are often many colours to choose from.

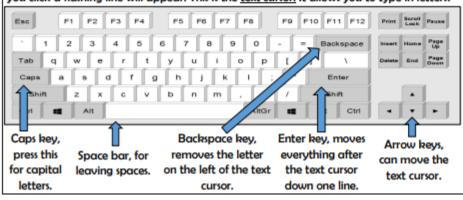

When we want to <u>save</u> our writing, we should click on this icon. The first time that we save, we need to choose a <u>file name</u> and a <u>location</u> (folder) to save it in.

### Using a Keyboard

-A <u>keyboard</u> is an <u>input device</u> that lets a person enter letters, numbers and symbols.
 -Most keyboards are laid out in the same way. This is often called the QWERTY layout.

The buttons on a keyboard are called keys.

-You can choose where to write by moving the cursor (the arrow) over the page. When you click a flashing line will appear. This is the text cursor. It allows you to type in letters.

# Making Careful Choices

The Toolbar

The <u>toolbar</u> is the set of icons and buttons that are at the top of the page in a word processor. Below are some of the most common tools.

# Hand writing or Digital writing?

 -Hand writing is often seen as more personal. For many people, it is a bit quicker than typing.

 -Digital writing is often neat, tidy and easy to read. It can be more easily edited (changed).
