

Biology: Living Things and their Habitats

Y1/2 Summer

What should I already know?

- That there are different types of plants and animals.
- That animals eat different things.

Vocabulary

Habitat	The place where something lives.
Basic needs	What living things need to survive: food, water, air and shelter.
Food chain	Shows what an animal eats and how they link together.

What am I going to learn?

- Some things are alive, some were once alive and some have never lived.

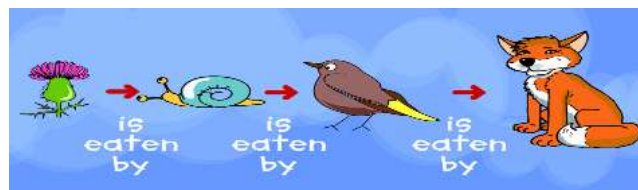

Alive Once alive Never alive

- That living things live in habitats they are suited to.
- Habitats provide the basic needs for plants and animals and the things in habitats depend on each other.

- Animals get their food from other plants and animals. This can be shown in a food chain.

Enquiry types

Pattern seeking	Fair testing	Research
Observing changes over time	Identifying, grouping and classifying	

Working Scientifically

Which micro-habitat in our school grounds do woodlice prefer?
